## C. J. BRAREN

### That Boy of Yours Rules the Home

You'd work twenty-four hours a day to supply his needs. Then don't fail to give him the greatest gift of all—HEALTH.

The best way to insure it to him is to start him off on bread now. **BREAD IS HEALTH-INSURANCE FOR HIM.**

Teach your children the Bread Habit. The earlier they begin the better, for bread contains lots of nourishment for active little bodies.

Our Bread is made from First Patent Flour, the other ingredients also being of the best quality only. Good bread is the best of all foods. Eat more of it.

Our Cakes and Pastry are also of the finest quality. Special next Thursday: English Doughnuts.

## CLARESHOLM LOCAL NEWS

Morning electric light service was resumed on the 2nd.

Help the U. F. W. A. ladies with their rest room fund October 16th.

H. Wannamaker has moved into the John Marsh house on Railway street.

Threshing is now nearly complete in this district. While there were some splendid yields, the average has not been quite as good as anticipated.

Blackie's Famous Hawaiian Singers and Musicians will be at the Rex again Tuesday, Oct. 19. Reserved seats will be on sale at the drug store shortly.

The voter's list will be posted next Monday, October 13, for election till Saturday night at R. K. Peck's office, from 2 to 6 o'clock every afternoon from Tuesday to Saturday, inclusive.

In order to enable the Editor to attend the annual meeting of the Alberta Provincial Council of Towns Association, held at Calgary on the 7th and 8th, we are putting this issue of the paper out a little early.

Several fine catches of trout are reported by some of the sports of the town. The catch record in the last few weeks has been a bit poor, but this will be nothing to the catch that the Forest Ranger is going to make some of these fine days.

Mr. Annable's threshing outfit tied up the C. P. R. yards here on Monday. The driver of the tractor, who had been driving the flat car at the loading platform drove it too far and the front wheels went off the other side of the car, hitting a wheel which was under the edge. It took most of the day to get the remaining wheel off the ground for a fresh start. In the mean time switching in the yards was at a standstill and the grain which had been transferred with Miraculousness, the tractor suffered only slight injury.

W. M. Gallop will sell by publication, at his farm two miles west and six miles south of Claresholm, on Wednesday, October 13, horses, cattle, hogs, chickens, machinery, harness, household furniture, farm tools, etc. For particulars see full page ad in this issue of the Review. Albert E. Strange, auctioneer.

John Miller, 73 years old, has been living with his daughter Mrs. J. Chilton, but recently went to Tacoma, Washington, to visit another daughter, died on September 27, her body was shipped here for burial and funeral taken place on Tuesday. Mr. O'Neill was 73 years of age, and an old timer in this district, having farmed for a number of years at Clear Lake.

The voter's list will be posted next Monday, October 13, for election till Saturday night at R. K. Peck's office, from 2 to 6 o'clock every afternoon from Tuesday to Saturday, inclusive.

To the editor of the Claresholm Local of the U. F. W. A. will hold a sale of fancy and useful articles, home cooking, and afternoon tea, in the Parish Hall, on Saturday, October 10, from 2 to 6 o'clock. All are asked to contribute three articles of home cooking and one of fancy work. Proceeds in aid of a rest room in Claresholm. We appeal to all citizens who have a spare hour, would like to help in this worthy cause.—E. Blanche Slipp, President.

The winsome young star Edith Roberts in a storm-and-sunshine comedy of life, love and laughter—*Alias Miss Dodd*, directed by Elmer Franklin. An old legend who just doted on deep-dyed devilishness, a romantic young girl, a lone lizard, an amateur criminologist and even a good-looking guy. All so steeped in deadly earnestness that every move they make is a scream. If you like drama, like farce or like comedy this is your picture. See it at the Rex this Friday and Saturday.

### Card of Thanks

## The Growing Responsibility of Labor

Significant of the change taking place in the minds of people as to the proper relationship which should exist between the individual and the public, or, perhaps, would be more correct to say between the citizen and the state, is a decision of far-reaching importance recently arrived at by the Amalgamated Postal Workers' Association in convention assembled at Edmonton.

By an overwhelming majority the convention decided to delete from its bylaws the clause allowing members to join in sympathetic strikes. It will be recalled that two years ago the postal workers made a similar decision to expel from their ranks those engaged in sympathy strikes, and that, as a result of congestion of mails, the whole country was put to inconvenience and loss. Again, last year, in the big Winnipeg strike the same thing occurred, notwithstanding that these employees were sworn servants of the State. Honorable sound to conduct the King's business no matter what might happen to the workers. The postal workers have by their own action declared that they will not countenance actions which bring inconvenience and suffering to all the people who are quite guiltless of having inflicted any injuries upon the workers and who are, as individuals, helpless to right wrongs and remove grievances which may exist. At the same time, and properly so, the Postal Workers' Association has decided that its members are not correct, cows which have good records against those that should be eliminated from the herd. The progress of cow testing, up to date, 58,000 cattle, is well known. Series No. A. H. White, B.S.A., shows that many farmers rely on guess work to pick out their best cows from which to breed calves for the future trade. Even though such animals are not correct, cows which have good records are not always the heat producers in the herd. Dairy records will do away with guess work, and the farmer can safely select his cows from the best breeding stock. The bulletin, "The Progress of Cow Testing," may be secured free upon application to the Publications Branch, Department of Agriculture, Ottawa. In addition to giving the results of the work done, it contains the details of the organization and gives some of the results obtained, which shows that many farmers have increased the production of their milk. From 1913 to 1915, the average per head had doubled the herd average in a few years. Wherever cow testing has been followed for a few years, a decided increase in the average production of each cow will be found.

The right of all workers to organize for their self-protection, and in order to enable them to bargain efficiently with employers as to wages, hours of labor, and the conditions under which they are called upon to work, is now universally recognized. It is officially accepted in the labor clauses of the League of Nations charter, and the principles which have guided the conception of the doctrine that a whole nation can be "held up" and denied the modern necessities of community existence unless any and every demand made is immediately and fully granted.

The strike weapon is an obsolete instrument for the redress of grievances. It is a two-edged sword, and inflicts as much, if not more, injury on those who use it upon those against whom it is directed. The methods of consultation, arbitration, and conciliation, and the establishment of courts of arbitration, are not only a balm but a much less costly way of arriving at a settlement of industrial disputes, just as they have been recognized in the League of Nations as the proper and Christian way of dealing with international differences.

Mighty as it never will, and they who attempt to force always hold themselves overmuch by force. The strength of organized labor lies in the sympathy and support of the people generally, and when labor resorts to any action which alienates popular sympathy and support it ruins its own cause. The individual is no longer allowed to take the law into his own hands to adjust personal grievances. The methods of consultation, arbitration, and conciliation, and the establishment of courts of arbitration, are not only a balm but a much less costly way of arriving at a settlement of industrial disputes, just as they have been recognized in the League of Nations as the proper and Christian way of dealing with international differences.

It need not be said that they who attempt to force always hold themselves overmuch by force. The strength of organized labor lies in the sympathy and support of the people generally, and when labor resorts to any action which alienates popular sympathy and support it ruins its own cause. The individual is no longer allowed to take the law into his own hands to adjust personal grievances. The methods of consultation, arbitration, and conciliation, and the establishment of courts of arbitration, are not only a balm but a much less costly way of arriving at a settlement of industrial disputes, just as they have been recognized in the League of Nations as the proper and Christian way of dealing with international differences.

Mighty as it never will, and they who attempt to force always hold themselves overmuch by force. The strength of organized labor lies in the sympathy and support of the people generally, and when labor resorts to any action which alienates popular sympathy and support it ruins its own cause. The individual is no longer allowed to take the law into his own hands to adjust personal grievances. The methods of consultation, arbitration, and conciliation, and the establishment of courts of arbitration, are not only a balm but a much less costly way of arriving at a settlement of industrial disputes, just as they have been recognized in the League of Nations as the proper and Christian way of dealing with international differences.

In this age there should be established properly constituted courts for the adjustment of all industrial disputes, in whom all parties can confide, and which will give full protection to the individual and property rights of all kinds.

It is a hopeful sign that organized workers, as represented by the Amalgamated Postal Workers' Association and certain other labor unions, are coming to recognize this. They will find the people supporting them, and their influence will be all the greater in future.

### Men Swear-Women Complain

Just because their corns achieve success with the Miller's Corn Extractor, the men of the Canadian Seed Growers' Association, at the conference on Soil Fertility and Soil Fibre, held at Winnipeg by the Commission of Reconstruction.

Working Up To It. Dorthea Gray, "Honesty, Conscience, you?" Alice—"Now, exactly yet. But he is approaching it step by step. When he first called me sat all the evening with a postcard album in his lap. Next time he sat with me, he took my little brother by his hand, so you see, I hope it will soon be my turn!"

### To Self Apply Direct

A plan by which Ontario fruit growers will sell their apples direct to Winnipeg consumers is being worked out by Mayor Gray, who says the people are tired of the "exorbitant prices" of the fruit men.

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and kidneys they control such diseases as scurvy, rheumatism, and other internal disorders that the tonsils create. Children therefrom are free from worms, condition their worm-infested stomachs may be, in this way, will show improvement as soon as the treatment begins.

Huge Department Store Under Construction. With the completion of plans for a Mall, leading to the new Manitoba parliament buildings the Hudson's Bay Company have started on their intention of constructing an immense departmental store in Winnipeg. The building is to cost \$5,000,000. Preliminary work is now being started and actual construction will commence early next spring.

A telephone bell was recently rung from a distance of thirty miles, by wireless telegraphy.

The United Farm Women of Manitoba are arranging a special two-week winter course at the Provincial University for rural workers, in order to fit them for more effective community and public work.

Farm Women for Variety. An electric motor boat was in operation at St. Peterburg in 1838.

Write to your eye-woman after long years of suffering has found complete relief through Dr. D. K. Kellogg's Asthma Eye Remedy. No snoring, no rattling, no difficulty in breathing, no soreness has been his suffering. This miraculous remedy gives you sure help to stop asthma, hay fever, colds, coughs, colds and simple fevers and makes you eat like a king. Mothers, you can make your little ones eat like a king, feed them well by just keeping a box of these tablets at hand. You will be surprised at the help to the boy that has his little bowels regular and his bowels clean. The tablets are sold by medical dealers at 25 cents a box from The Dr. William Medicine Co., Brooklyn, Ont.

Grandulized Eyelids. Your Grandulized Eyelids, Eyes informed by experts to be the best relieved by Maria E. Kennedy. No Snoring, No Rattling, No Difficulty in Breathing, No Soreness. Your Druggist or by mail 60c per bottle. For Book of the Eye write Maria Eye Kennedy Co., Chicago.

## Eliminating the Poor Cow

### Cow Testing the Only Sure Method To Obtain Increased Production.

The object of cow testing is to give the dairyman accurate knowledge as to the quality and quantity of milk of each cow in the herd. It is usually admitted that the average cow does not produce as much milk as she is capable of giving, and many dairymen keep one or more cows that do not produce as much as the others. Keeping shows which cows are worth keeping in the herd and gives evidence against those that should be eliminated from the herd.

The progress of cow testing, up to date, 58,000 cattle, is well known. Series No. A. H. White, B.S.A., shows that many farmers rely on guess work to pick out their best cows from which to breed calves for the future trade.

Even though such animals are not correct, cows which have good records are not always the heat producers in the herd. Dairy records will do away with guess work, and the farmer can safely select his cows from the best breeding stock.

The bulletin, "The Progress of Cow Testing," may be secured free upon application to the Publications Branch, Department of Agriculture, Ottawa.

## Good Seed to Increase Crops

About Sixty-four Million Bushels of Stale Grain Required Each Year.

Good seed, means to Canada's prosperity, and the Canadian Seed Growers' Association, at the conference on Soil Fertility and Soil Fibre, held at Winnipeg by the Commission of Reconstruction.

Working Up To It. Each year, Canada requires approximately 45,000,000 bushels of seed grain and 9,000,000 bushels of seed potatoes, or about 3 per cent of her annual average production.

An increase of but one bushel per acre of this area would add approximately \$800,000,000 to the wealth of the country. One of the chief methods of increasing production is to grow more varieties of seed of better breeding and of varieties better suited to the districts where sown.

About Sixty-four Million Bushels of Stale Grain Required Each Year.

Good seed, means to Canada's prosperity, and the Canadian Seed Growers' Association, at the conference on Soil Fertility and Soil Fibre, held at Winnipeg by the Commission of Reconstruction.

Working Up To It. Each year, Canada requires approximately 45,000,000 bushels of seed grain and 9,000,000 bushels of seed potatoes, or about 3 per cent of her annual average production.

An increase of but one bushel per acre of this area would add approximately \$800,000,000 to the wealth of the country. One of the chief methods of increasing production is to grow more varieties of seed of better breeding and of varieties better suited to the districts where sown.

## Transforming the Prairie Farms By The Planting of Trees

Mr. J. R. Musselman, in the Regina Leader, contributes the following article on the subject of the work of the Canadian Forestry Association. The inestimable value of a "tree work spot" on tree planting on the prairies is very clearly shown.—Mr. Musselman says:

"It were difficult to conceive of a better way to spend the precious leisure time of the people of Saskatchewan than that which is carried on by the Canadian Forestry Association through the medium of its "Tree Planting Cat." Its car, No. 11, is now touring Saskatchewan, and it is gratifying to note that all stations visited, farms in goodly numbers have been in attendance to hear the lectures, to discuss with the experts their local tree planting problems, and generally receive information on the cultivation of trees and shrubbery on the plains. The car has still to visit a large number of points, a list of which, together with a map, is appended hereto."

A good deal of eastern and well placed shrubbery about a farm home constitutes an excellent and profitable investment in any country. On the semi-arid and treeless plains of Saskatchewan, the value is almost beyond estimate. On the basis of money's cost trees constitute a more profitable investment than elaborate buildings.

During a recent extensive tour trip along the prairie routes through the prairie sections of central Saskatchewan, the visitors were deeply impressed with the barrenness and soullessness of home after home where well designed and comfortable houses stand in the attractive nestbeds on the open treeless prairie without hedge or shrub and lacking that absolute essential to a pleasing picture of a human habitation—green bushes and trees. On the other hand, when a farm house was passed which was surrounded by a shelter belt or had on its north side a substantial grove of trees, exclamations of delight were heard from all, quite without regard to whether or not the house itself was small and unpretentious.

All groves are sure to come upon the market at some time. A well-made homestead makes a very attractive purchase, and the farmer who is looking for a home as well as an investment.

Nature has done so much for us on these great fertile western plains that we need but just that we do our little in cooperation with her to add beauty and charm to the landscape. We destroy the green and soft brown of the prairies for our own profit, substituting for these the cold, sharp, brittle dust, so we are robbing ourselves and posterity of those invaluable eye-resting colors which nature provided.

Most largely a machine builds around an origin of sight. More than half the romance has been generated by him as expanded in seeing—so occultists say. Nearly all that we know we imbibe through this sense and our

characters are formed and our destinies fixed largely by what we see. It is not good for our highest ethical development that the housewife's farm should look only into glancing sunlight each time she gazes out of the window. Her children, the little ones, should lack shade of trees for their playground. It is not good for the budding character of children that they should grow up in homes where there are no sunrooms. Be the house ever so small, if neat and clean, with a garden, a lawn, a hedge, a few flowers, and a good grove of trees, shrubs and shrubbery on the plains, the better environment for the child to grow up in than the frosty farm house in the prairie if this be wanting."

The excessively bright sunlight and the extraordinary aridity of it make the treeless regions of the prairie great deserts in this country. Is also the main or a contributory cause of many, many ailments. Erysipelas is responsible for many derangements of the physical organism. Many a person has been stricken with erysipelas, having been physically and not a few mentally as well, to whose tired eyes and nerves overstrained by the sun's unbroken glare, the soft green of a cagara hedge in the background should be a great relief. The trees would have been an untold blessing. The ceaseless rustle whistled of the relentless dust-laden prairie winds as they beat against the bare branches of the trees as they waste and nest in their shade recesses." No farmer is getting the best out of life by doing the best by his family who continues to live in a treeless house.

"On the homestead where the winter lived until he was called to his present work is a grove of around four thousand trees, nearly all of which were planted by his insignificant hands with results.

There are rows of maple and carama grown where they stand from seed planted as simply as rows of corn and there are willows from cuttings placed under the prairie snows, and also, of course, from seedlings planted with greater care and supplied free from the Dominion Forest Service at Indian Head.

These trees have not long since become the property of another; these trees have repaid the planter a thousand times. His full satisfaction, however, is a knowledge that the grove will offer its blessings to the next generation, for the trees whose earliest feet may tread beneath its leafy boughs or whose rounded heads will build castles in the air while playing in its yellow shades.

What more can one be offered in the landscape of this country and in the attachment of her citizens to their homes, if every farmer would each year plant at least a few trees.

## The Little Potsdam

Name Given By Dutch Newspapers To Kaiser's Home

The former German Emperor, William II, has probably failed to lead at Doorn the quiet life of a country gentleman, has, nevertheless, created a little court around him—somewhat larger than that which he had at Amerongen and Dutch newspapers have already dubbed it "The Little Potsdam."

The Allies' demands upon Holland to guard the former emperor closely have made it impossible for William to leave Doorn, where he has a country estate which he owns alone, and the big house where he is said to expect to spend his remaining days is just like a little bit of Germany.

Strict military orders prevail outside the House of Doorn, where the Kaiser's bodyguards are posted. Within the discipline is Prussian. William's only associates are Germans. His entire staff, including approximately 40 servants, are Germans, with one exception—a Dutch baron, a Dutchman, is called in now and then to trim his hair or beard.

When at Amerongen, William went frequently to Doorn by automobile, but now he is forced to travel by train, having lost his horse, which the villagers call his "40-Acre cage." Forty hectares are about 90 acres.

The few times he has been out, he has paid visits to his former host, Count Bentinck, at Amerongen, Neth., and to the former crown prince or others of William's sons, largely because of the illness of their mother, but, from day to day, William seldom sees any new faces—only his daily associates.

No "Corner" For Him

Once Sir Thomas Lipton in a business deal came into possession of a large quantity of wheat. He was advised to store it in a corner of his granary, but he did not do so, fearing the marten and foxes would get at it. The farmer, however, was not afraid, and, considering all the possibilities of his granary, he decided to store the wheat in a corner of the room, and, as he had no place to go, he went to bed in the same corner. The marten and foxes did not get at the wheat, but the farmer did not get at the marten and foxes.

Wheat Grading High

No. 1 Hard, average yield 25 bushels to the acre, weight per bushel 66 pounds, is remarkable record provided by the first car of Alberta wheat to reach Calgary.

## Crop Rotation

Dr. Gridle Emphasizes this Necessary Factor of Permanent Prosperous Agriculture

"The maintaining of the land as high as possible and keeping the moisture-holding power of the land as high as possible are factors that are of prime importance. A crop rotation, therefore, that is satisfactory makes preparations both by getting the soil in right shape and by cultural methods to hold that moisture as well as it possible can be held, by storing all the moisture that comes down."

"Another advantage in crop rotation is the conservation of the fertility and the maintenance, if not the increasing, of the fibrous content of the soil."

"Nearly all farmers are following rotations. They get into the habit of following some kind of a system, and if you are holding some land, and every year you are breaking up the same kind of a soil, the work is not good."

"The more a farmer follows a rotation, the more he gets into the best rotation on another. That we appreciate this is shown by the fact that we have on trial on our experimental farm some twenty-old rotations in the West."

"I think the most important step in progression to be made on these prairies is the introduction of a better rotation. We have a rotation now, but it is a bad one. What we want to do is to change it and make a better one, and that is what we are trying to reach at this Conservation meeting. If we could get that change—if we could get the farmers of this country thinking along the right lines, we could have a better rotation in the West to four years in the eastern part of these prairies, including a summerfallow in each case, and considering all the possibilities of our land or soil, we could have a better rotation in the West than any other convention or meeting of men have ever done in the history of the Prairies."—From address of Dr. J. H. Gridle at Conference on Agriculture in the Commission of Conservation at Winnipeg.

You will waste ammunition unless you have an aim in life.

## Agricultural Wealth Of the Dominion is Making Rapid Increase

The gross value of the agricultural wealth of Canada in the year 1919 has been estimated by the Government at \$2,739,299,000, and is arrived at in the following manner. The total estimated agricultural products for the year is \$1,975,841,000. From carefully compiled statistics, the value of farm land throughout the Dominion is computed at \$2,792,299,000; buildings at \$927,548,000; implements at \$87,079,000, and farm live stock at \$1,296,602,000.

"All these items are added to the annual agricultural production and the result is the Dominion's gross agricultural wealth."

"The agricultural wealth of Canada, and productivity, in spite of the year of war, has been both steady and substantial. Agriculture is the Dominion's premier industry, and for years to come, if not for all time, the majority of the revenue will come from the countries which cover her domain. In 1915 the total value of all farm crops and products in Canada was \$1,118,694,000, while for the year 1919 that had increased to \$2,739,299,000."

"Another factor in the rapid increase in the value of agriculture is the opening of new sections, and the flood of immigrants from all sides.

"Another advantage in crop rotation. They get into the habit of following some kind of a system, and if you are holding some land, and every year you are breaking up the same kind of a soil, the work is not good."

"The more a farmer follows a rotation, the more he gets into the best rotation on another. That we appreciate this is shown by the fact that we have on trial on our experimental farm some twenty-old rotations in the West."

"I think the most important step in progression to be made on these prairies is the introduction of a better rotation. We have a rotation now, but it is a bad one. # AUCTION SALE

Acting on instructions from **Mr. W. M. GALLOP**, who is retiring from farming, I will sell by Public Auction without reserve, at his farm, Sec. 17-11-27, 2 miles west and 6 miles south of Claresholm; just 4 miles south of Trout Creek School; known as the Alec Elgin Farm; on

# WED. OCTOBER 13

the following valuable farm property:

## Horses

- 1 bay Gelding 6 years.
- 1 grey Gelding 6 years
- 1 bay Gelding 7 years
- 1 pair bay Mares 5 years
- 1 grey Mare 8 years
- 1 black Mare 9 years
- 1 buckskin Mare 10 years
- 1 pinto Mare with colt at foot  
(The above are all first class work horses)
- 1 brown Filly 3 years
- 1 pair black Fillies 3 years
- 1 grey Filly 3 years
- 1 grey Gelding 3 years
- 1 bay Gelding 3 years
- 1 bay Gelding 2 years      1 yearling Colt

## Cattle

- |                         |                  |
|-------------------------|------------------|
| 7 first class Milk Cows |                  |
| 2 Heifers 2 years       | 2 Steers 3 years |
| 6 Calves                | 1 Steer 2 years  |

## Machinery

- 1 Dominion Wagon and Box
- 1 Anderson Wagon and Box
- 1 Deering 8 foot Binder
- 1 McCormick Single Disc Drill
- 2 Cockshutt Disc Harrows
- 1 14-inch Gang Plow
- 1 16-inch Sulky Plow, also Breaker Bottom
- 1 Wood Beam Harrow
- 1 Garden Cultivator
- 1  $1\frac{1}{2}$  H. P. Gasoline Engine
- Also a Blacksmith Outfit
- 1 Buggy
- 1 Water Trough

## Harness

- 3 sets Work Harness
- 1 set Driving Harness

## Hogs and Chickens

- 2 young Sows
- 25 Plymouth Rock Chickens

Together with Household Furniture, Farm Tools and other useful articles too numerous to mention.

Sale starts at 1 o'clock sharp. Lunch at noon. **TERMS CASH**

**R. E. MOFFATT, Clerk. ALBERT E. STRANGE, Auctioneer**

# Cattle for Sale

**250 head of Stocker and Feeder Steers, 1 and 2 years old. Also 100 head of yearling and 2 year old Heifers. Will sell privately in car lots to suit purchaser. The above cattle are a well bred bunch.**

H. COHEN,  
Auditorium Hotel, Nanton, Alta.

Claresholm U.F.A. Co-Operative Ass'ns Ltd.

## Important Notice to Farmers

**Serious coal shortage expected this winter.** Important that coal supply be purchased early, if inconvenience, and even suffering is to be avoided later on. If you doubt the seriousness of the situation and wish for full information, please take the matter up with the undersigned.

The United Farmers of Alberta  
R. S. Law, Local Secretary

## TIME TO ORDER

Now that harvest is on, it is time to place your order for any of the following:

Rumely Tractors and Separators  
Twin City Tractors and All Steel Separators  
Lauson Tractors  
Monarch Tractors  
McLaughlin Cars  
**Vanhorn & Stebbins, Ltd.**  
"SERVICE THAT SATISFIES"

## We Solicit Your Patronage

Sash, Doors, Interior Finish,  
Beaver Board.  
All orders carefully handled.  
Try us and get the service you need

## Claresholm Local News

Rev. Locke spent several days in Gramma this week.

There is considerable sickness among the children in this vicinity at present.

Remember the A.C.F.W.A. sale of fancy work and home cooking on Saturday, October 16, in the Methodist Church.

Mr. and Mrs. C.V. Relyea, who were here for the funeral of Mrs. Relyea's father, John Miller, left Monday last for their home in Melville, Washington.

Dr. C. E. Buchanan, graduate of Ontario Veterinary College, University of Toronto, has decided to locate in Claresholm. He has arranged for office rooms over Mr. McKenzie's barber shop.

The missionary lecture by Rev. C. C. Clark, last evening, was well attended. She has spent several years in India and gave a very interesting account of the Salvation Army work there.

A stockholders' auctioneer, now ready to receive all sales, Mr. Runions is an old experienced live stock auctioneer. Satisfaction guaranteed. Give me a trial and be convinced. Phone R904, or see Tom Bernard, clerk.

### OBITUARY

The body of the late John Miller, an old time resident of Claresholm, was accidentally killed at Carnation, Washington, on September 22nd, arrived at Claresholm for burial on Wednesday evening the 29th inst. The funeral was held from the Methodist church at 2 p.m. In the afternoon of the 30th, the service being conducted by the Rev. Mr. Locke assisted by the Rev. Mr. Mitchell, and was attended by a large number of friends of the family.

The local tributes were many and costly and attested the esteem in which the late Mr. Miller was held by the community. A large number of citizens were painfully surprised when they learned the Mr. Miller who was reported killed at Carnation was the old timer here, as he was

thought to be still living at Ponchonias in northern Alberta, to which place he had gone from here in July 1919.

It is however, that he had left that place in May 1920, by way of Vancouver to Sellack, Washington, where his wife and the younger children were then visiting with the married daughters, Mrs. Relyea and Mrs. Rogers.

In July last he secured a position with the Chicago, Milwaukee & St. Paul Railway Co. as a bridge engineer, and was working on repairs to one of the company's bridges near Carnation, and on the 22nd just about 4 o'clock in the afternoon, having left his car at a certain place on the bridge, and a slight rainfall coming on, he walked over to where the coat lay and while in so doing, stepped on a piece of timber known as a "bridge boat" which had been left lying loose on the girders above, directly over the spot where he left his car.

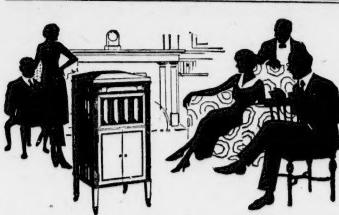

He was killed instantly, the back of his skull being crushed completely to a pulp.

John Miller was born in the township of McNab in the Province of Ontario on May 26th, 1863, and was married to Miss Eliza A. Rooney of Eau Claire, Ontario, on the 18th day of April 1894.

He and his family came to Claresholm in December of 1907 and up to the time he left here he had been a resident always an active part in the town's affairs, first as utility man for the town and later as town foreman and then as engineer at the power plant.

He had always been esteemed by the citizens for his sterling integrity and his devotion to duty, and his untimely death is sincerely mourned by a host of friends.

He leaves behind his wife, three daughters and two sons, Mrs. C. V. Relyea of Stampede, Columbia River; Mrs. Rogers of Sellack, Washington; David and William at home, his father and one brother, two sisters in Chapleau, Ont., and two sisters in Creston, B.C.

## While the Family Sits Around

On quiet evenings or afternoons, put on your favorite records. Play any selection you wish. Be sure to play some of mother's favorite old-time songs and one or two of dad's familiar ballads—play them all on your Columbia Grafonola.

You will get reproductions of exactly what the artists themselves produced on the original work. Every note, every tone is distinct. The Columbia tone leaves give you complete and accurate control over tone volume without sacrificing tone quality or any of the beauty of your choicest records.

Then there's the Non Set Automatic—no other phonograph has it—built right into the motor. Invisible. Nothing to move or set or measure. Just start your Grafonola, and it plays and stops itself.

A13

## Love of The Wild

BY ARCHIE P. MCKINNIE  
Printed by Special Arrangements with Theo. Allen,  
Toronto, Ont.

(Continued)

"They're a bunch of bad ones," said Smythe, "a regular band of cut-throats. They know no law but their own. I'd sell a soul to get rid of them." "But the timber isn't worth a cent," said the Colonel. "It has invited all other vagabonds to you. They swear they will kill you if you set foot on Bushwhacker's Place."

"I'm not anxious to see foot on Bushwhacker's Place providing can get away with it," said Dr. Hamilton's Pills. "I must have an audience. But the timber I must have. I gave Watson money with which to start the ball rolling. Maybe I'll see that again and maybe I won't. As I said before, I don't trust either of you very far. But both of you know me."

"We'll do our very utmost to get the timber," said Smythe, and as the Colonel turned toward him he added, "you're right."

"It might be a good idea," said Hallibut. "As for those Bushwhackers, I'm not caring a cent what they think of me. I tried to show them that I was interested in their welfare by giving them a few cents, but they might educate their children, so by giving it to them—it and the land it stands on. I've hired young Simpson to teach the school, or you did with me, which amounts to the same, and after all this you say the Bushwhackers want to kill me. Grateful, aren't they?"

"If you hadn't built that mill after you had got possession of the timber—!" faltered Smythe; but the Colonel interrupted him.

"See here, I built that mill on my own land, didn't I? Surely I don't have to ask permission from anybody else when I want to do anything with my own?"

I was merely going to say that the man who drives the fur-bearing animals out of the creek," snorted Smythe. "The Bushwhackers say you have spoiled the best trapping, sir."

"Well, I'm sorry for that," said Hallibut, "but I must stop on those points as a simple-hearted lot of men and women whose friendship was worth the winning. It's funny—no wanting friend at the age, but I'm getting old and fanciful."

Smythe scratched his chin and squinted along the beat-like nose as though he were aiming the remark at a crack in the floor, as he said: "I suppose they're not particular about having the creek there. They like mostly by shooting and trapping. But I do know that two thousand acres of walnut, beech, and hickory is worth a fortune to somebody."

"Humph! And how long have you known that? Seems queer to me that

### Just a minute, please!

**H**E'RES a timely suggestion for your vacation.

Put in an Ingersoll Maple Leaf with a Radiola dial—the face that lights up in the dark.

The cost will be \$4.00, and for that you'll have a hardy, light, compact watch, built to keep going wherever you're going; to stand any rough stuff you can stand, to give you faithful record of the time of day and night.

Thus you can give your expensive watch a vacation in a nice comfortable strong box, knowing that the Maple Leaf will tell just as good time and keep hardships much more cheerful.

Then if you lose the Maple Leaf Radiola—you should worry, when you realize you've only got one watch and lost your high priced watch!

And there isn't any town too small to supply you with a new Maple Leaf."

*Maple Leaf Radiola, \$4.00*

Models from \$3.25 to \$14.50

## MOST EVERYONE USES THEM FOR THE STOMACH

They Act Quickly, and Make You Feel Lively as a Kid

A crowning, curative triumph in medicine is now given to the world, stomach ailments, indigestion and headache can be cured by a purely vegetable diet.

Cayenne, salts and such like are no longer necessary. They are harsh and disagreeable, and are not nearly so satisfying far superior, and you can go today with 25¢ to any druggist and buy a bottle of Beecham's Pills.

They last longer, and are more palatable, and are considered the very quickest and safest cure for the stomach.

Half sick men and women, who scarcely know what all illness, will find Beecham's Pills a great help.

Spirits disappear, headaches are forgotten, purified and enriched, pain at the base of the spine are cured, the nerves are strengthened, the heart is strengthened, and day by day the old-time health and vigor return.

It is necessary to prove Beecham's Pills beneficial. Dr. Hamilton's Pills are for all who are weak, nervous, thin, depressed or in failing health.

"What was in the parcel?" he asked.

"Wines," said Smythe.

"I'm coming to that. It seems a good woman at heart. She wanted to keep the baby. But he sent the child away into the forest with an Indian on a sledges and kept the child."

She made five dots on the paper before him.

"What was in the parcel?" he asked.

"Wines," said Smythe.

"I'm coming to that. It seems a good woman at heart. She wanted to keep the baby. But he sent the child away into the forest with an Indian on a sledges and kept the child."

She made five dots on the paper before him.

"What was in the parcel?" he asked.

"Wines," said Smythe.

"I'm coming to that. It seems a good woman at heart. She wanted to keep the baby. But he sent the child away into the forest with an Indian on a sledges and kept the child."

She made five dots on the paper before him.

"What was in the parcel?" he asked.

"Wines," said Smythe.

"I'm coming to that. It seems a good woman at heart. She wanted to keep the baby. But he sent the child away into the forest with an Indian on a sledges and kept the child."

She made five dots on the paper before him.

"What was in the parcel?" he asked.

"Wines," said Smythe.

"I'm coming to that. It seems a good woman at heart. She wanted to keep the baby. But he sent the child away into the forest with an Indian on a sledges and kept the child."

She made five dots on the paper before him.

## Baby's Own Soap

Many Canadian Beauties owe much of their exquisite complexion to the creamy, skin-healing, fragrant lather of "Baby's Own Soap".

*It's Best for Baby and for You.*

ALBERT SOAPS LIMITED,  
Manufacturers,  
MONTREAL.

## Rural Schools Predominate

Seventy-five Per Cent. of Total Enrollment in Saskatchewan is in the Country.

In Saskatchewan about seventy-five per cent. of the total school enrollment is found in the village and rural schools. In addition, all the town schools contain a large percentage of students who are from the country, and while our cities are not sufficiently to be entirely removed from the influence of the rural environment. The predominance of our rural school population has been kept in view when training our young countrymen in elementary education.

Agriculture is a subject of study for Grades VII, VIII, and VIII. While it covers every phase of this important industry it is developed from the nature and needs of the students rather than as a science subject, the course being designed to be the crown or top stone of the nature study work of the previous grades. This method of treatment is advocated so as to keep the work definitely related to the environment, to the people, and to permit of such modification of subject matter as will best meet local requirements.

The practical working out of the course is based upon the present method. It is quite satisfactory. Gardening and poultry hold the chief place of interest in many larger centres with the development of a full course, while the smaller centres have street culture the character of the work being attempted.—Augustus H. Ball, M.A., LL.B., Deputy Minister of Education.

The Greeks regarded arbor with religious reverence due to its mystic properties.

A fly walks—in proportion to its size—13 times as fast as a man can run.

## And His Family Medicines

MOST people first knew Dr. Chase through his Receipt Book. Its reliability and usefulness made him friends everywhere.

When he put his Nerve Food, Kidney-Liver Pills and other medicines on the market they received a hearty welcome, and their exceptional merit has kept them high in the public esteem.

Take Dr. Chase's Kidney-Liver Pills every day. There is no treatment to be compared with them as a means of regulating the liver, kidneys and bowels and curing constipation, rheumatism, kidney disease and indigestion.

Das will a dose, 25¢ a box at all dealers, or Emanuels, Bates & Co., Ltd., Toronto.

## Dr. Chase's Kidney-Liver Pills

### Farmers to Keep Books

Will Have Record of All Expenditures and Receipts.

Twenty-nine thousand Nebraska farmers have obtained a copy of the new record book for the purpose of keeping books this year.

The farm record book provides for an annual inventory of all lands, stock, implements, grain, feeds, etc., and for a complete account of all expenditures and receipts. The record book is to be used in the same manner as the ledger, naming the books will lessen his gross and net incomes, profits and losses on all kinds of stock, crops and other farming operations, and have a record of all expenses and receipts. The record book will be of value not only for sentimental reasons but for determining income tax, as well as a complete record of all business for the year.

### If Breath Comes Hard

#### If Nose is Plugged

#### You Have Catarach

Perhaps you haven't heard of the new nostril wash, so please let me tell you the nose washes and lung washes with a healing balancer vapor like the air of the pine woods. It's really a nostril wash—antiseptic and antiseptic antiseptic only found in the Blue Gum tree of Australia.

The nostril wash is called Catarachore, and you can't find its equal on earth for courage. You see it's no longer necessary to drug the stomach—that spoils digestion and causes the body to become exhausted. In Catarachore, which are so rich in healing that they draw in every tissue.

For speakers and singers and persons troubled with an inflamed nose, Catarachore is of inestimable value.

Catarachore can be carried in your pocket and may be used at any time or in any place. It is guaranteed, and sufficient for two months' use costs \$1. smaller size, 25¢; sample size, 25¢ by all storekeepers and drug-

### Moldy Silage

#### Using Plenty of Water at Filling.

Sure Way to Avoid Difficulty.

More or less concern is regularly expressed by farmers over the fact that they find moldy spots in their silage. Some report that the losses from mold in silage amount to a good deal. Others express the opinion that moldy silage is poisonous to horses of livestock. What are the facts?

There are several kinds of mold that appear in silage depending upon the conditions favoring their growth. The amount of mold depends upon the way the silage is packed.

Molds require air for their growth and if the corn is put in the silo when it is too mature or too dry there is not enough moisture to sustain them.

Insufficient tramping also leaves air pockets which give the mold an opportunity to grow.

As far as known there is only one mold which is really poisonous to cattle.

This is not much doubt but that it sometimes causes digestive disturbances and there are good reasons to believe that it frequently causes diarrhea and sheep. Cattle, however, do not seem to be seriously affected by it.

Nevertheless, the safest policy is to always discard moldy silage.

Henry's and Morrison's Feeds and Feedings say "Silage must never

should always be discarded, and special care taken to feed no such material to sheep or horses, which are much more easily affected by it than cattle."

The use of plenty of water at silage filling time is one of the surest ways of avoiding difficulty from molds if the corn has been frost or has become overripe.

If one cuts at the proper time and thoroughly distributed and tramped in an airtight silo. What air remains after this is done is used up in the fermentation process, which has a tendency to remove the mold.

It is evident that the greater the amount of water used the less chance there is for the mold to grow.

If the corn is cut at the proper time and thoroughly distributed and tramped in an airtight silo. What air remains after this is done is used

up in the fermentation process,

which has a tendency to remove the mold.

Those who have not already built their silos should not be alarmed for the silos should be converted into moldy silage. Silage odds should be considered as something that can be prevented.

A fill for brain workers.—The brain is the seat of the nervous system and is more liable to derangement of the digestive system than the man who has a weak heart. If you feel you are not able to do your work, you call upon my nervous energy while the other applies only his muscular energy. The brain is the seat of the irregularities of the stomach and liver, and the best remedy that I have found for this is the use of Dr. Chase's Pill. These are specially compounded for such cases and all those who use them can certify in their superior power.

As a remedy there is no preparation that equals Mother Grays' Worm Extinctor. It has saved the lives of countless children.

### Perennial Hot Water

French Village Has No Use for Coal Or Wood.

With the price of coal unprecedentedly high and still soaring, one reads with envy of the French village of Castagniers, in the Avergne Mountains. It is built in the crater of an inactive volcano. A number of stone-covered wells furnish boiling water, which flows down mains beneath the roofs of houses. Not a chimney to be seen in the village, which is surrounded with snow-covered peaks from October to May.

Neither stoves nor ranges nor boilers are to be found; neither coal nor wood nor any other kind of fuel is used. The water is always warm, even when the temperature outside is below zero. In the floor of each house are several holes leading to the main pipes. To heat a house the covers of the holes are closed, and the water is then allowed to flow to the flow of hot water which is always ready just outside the village.

The Bank of Amsterdam was the greatest warehouse for bullion in the seventeenth century.

### Care of Machinery

Implements Kept in Repair. Give More Satisfactory Service.

Do not merely go through the motion but shelter machinery completely, and before doing so, first list the parts that are exposed to weather and secure along them a season of bolts, rivets, springs, etc., to prevent rusting. For speakers and singers and persons troubled with an inflamed nose, Catarachore, which is of inestimable value.

Catarachore can be carried in your pocket and may be used at any time or in any place. It is guaranteed, and sufficient for two months' use costs \$1. by all storekeepers and drug-

stores will answer the purpose.

### FREQUENT HEADACHES

#### A Sure Sign That the Blood is Watery and Impure.

People with thin blood are much more prone to headaches than full-blooded persons, and a condition that affects growing girls, teenagers, and others, is headache, together with disturbance of the digestive organs.

Those with constant recurring headache and pallor of the face, they show that the blood is watery and impure. When the head is rectected toward building up your blood, a fair treatment with Dr. Williams' Pill will remove the headache and the rich red blood made by these pills will remove the watery blood.

Headaches are caused by those

who have a tendency to drink beer.

Those with a watery blood are caused by their blood than most people have any idea of. When you suffer from lack of nourishment, and you may be troubled with insomnia, you are likely to have a watery blood, and those subjects to strain are undernourished and you may have muscular spasms. ## Canadian Persian Lamb

(1) A Karakul flock gathered for inspection.

The aggressive and enterprising with the diversity of climates to be found throughout the Dominion review new lines of agricultural activity. A recent introduction which has apparently assumed important proportions developing into a commercial business is the raising and breeding of Karakul sheep. These young produce the far valuable skins used in the manufacture of khaki and Karakul. This breed is not the known on the American continent through its first experiments have been made with this animal in Ontario, Nova Scotia and in British Columbia. The Long Horns of the Rockies which are hardy mountain sheep are being introduced into the river Zephane valley in the Kootenay district of the Canadian Rockies. Many deep-snowed passes now in this region, the snow about six inches, which form the favor-

the food of the sheep in the summer months when the animals are killed within three days after birth. The lamb is born with a thin coat of hair which disappears as the animal grows and becomes more and more hairy. At the age of one year the animal's growth gradually becomes straight, losing every vestige of feature at this time. The animal is then about 100 pounds. In the year 1912 the Karakul sheep was first introduced into the Dominion and since that time the number has increased rapidly. In the following year small herds were established in Alberta and British Columbia. The animals were first introduced to the market in 1914. The Karakul sheep from Bokara known as the best in the world. The skins are treated and dyed at Leipzig where two houses alone received 750,000 skins in 1913. The skins are sold at pre-war prices. Recently P. E. Dawson established a Karakul farm near Lethbridge for New York who has been raising a herd of 45 animals. The skins are sold at \$150 per pair and in the Kamloops district of British Columbia on which he has established a similar ranch. The animals are raised to 10 years old.

### OUR ELECTRIC LIGHT SERVICE

#### Editor Review:

Might I ask our city fathers through your columns when we may expect to have an all night service from this time last year ago we were told that it would not pay to run this all night as there were so few users of electric light. However, at present things have changed from what they were a few years ago. There may be now more users of the light that formerly used it if the council could, they certainly should give this service to the citizens by 1st September to 1st May.

If the council had given proper service to the citizens they should never have lost as consumers the two garages who are now running their own plants also the picture show—and by the way these places now seem to have an interest with their own power systems. We are now running a gas plant instead of a steam plant, which we were told would give us a better service and so at a cheaper rate. Are we, I know, paying more for wages, etc., which everyone expects to do, and rightly so, as the workers have a right to live, but we are paying also more for the lights which should offset the increase in wages.

There certainly seems to be a waste of light during the day—streets and lights. There ought to be a way of turning off the lights in the streets without shutting off the business and private dwellings. During the winter months when the sun is low on the streets long enough after the sun was up, and during the darkness of night when they were used the town was in darkness. Then there is the loss of public lights. Why should the council give away what we can ill afford? Are not our rates high enough? When I was a boy I heard of a rich man who was a gentleman in the old country who used to rob the rich man to give to the poor, viz., "Robin Hood." Poor Robin Hood! "Country" seems in this matter to go the other way about and take out of the poor man's pocket and give to his richer neighbor. Anyhow that is how it strikes one, for if the council did the same thing as a rule better off than the man without one, I have missed my guess. If the town needs more lights, and perhaps it does for good reason, set out a few lights extra on the streets and do away with special privileges which in many cases in the past have been very much abused.

Thinking that it would be well for the council to consider is the fact that the private light companies are putting on the market smaller lights than those mentioned did any harm? I doubt not that a little while these will be small enough so that business places will be able to install these plants at a much less cost. Light fixtures are offered at present. Poor citizen, did I hear some one say? Well gentlemen, it is up to you. Give us service.

### BUSINESS LOCALS
